Topcon Introduces a New Wireless Review Station for its Non-mydratic Retinal Camera Systems

*Now eye-care professionals can review patients' retinal images from anywhere
in their offices even when going from room to room.*

OAKLAND, NJ, June 25, 2014 – Topcon Medical Systems (TMS) of Oakland, NJ announces the availability of a wireless review station that can be used with the TRC-NW300 and TRC-NW8 non-mydratic capture systems running IMAGEnet[®] 5. This innovative device allows reviewing images from an IMAGEnet[®] 5 capture station via Wi-Fi up to a distance of 30ft. The transfer period is only 5 seconds when saving captured images in JPEG format.

The wireless review station can be left permanently in an exam room or can be mobile from room to room in a 30ft. radius. Commercially available monitor, keyboard and mouse can be added by the user for his/her convenience.

The wireless review station includes a Wi-Fi capable IMAGEnet[®] System Notebook with IMAGEnet[®] 5 review software. The first wireless review station to be used in an office requires the use of a wireless router which is connected via USB to the

capture station. Additional wireless review stations do not need extra routers. Several wireless review stations can be used at the same facility.
