Topcon Introduces New CV-5000S Online Training Program

The First in a Series of Online Product Training Modules

OAKLAND, NJ, September 26, 2013 – Topcon Medical Systems (TMS) of Oakland, NJ is pleased to announce a new online training program for its CV-5000S Automated Refraction System. A preview of the program will be shown at the upcoming Vision Expo West Meeting in Las Vegas, with the full version expected to launch in November.

The new ***CV-5000S Online Training Program*** is the first in a series of interactive, online product training systems. It shows CV-5000S users how to conduct a refraction, breaking it down into small, user-friendly learning modules. Through a combination of narrated video, graphics and step-by-step instructions, the system highlights the key features of the product and the operating procedures associated with each one. Users are also shown how to create customized refraction programs with the CV-5000S.

The system will be available 24/7 on the Topcon website to registered users, allowing them to access it at any time and from any location. This value-added feature of the CV-5000S will not only enhance the customers' experience but also make the refraction process a smooth and effortless procedure for both patient and operator.

The CV-5000S Automated Refraction System from Topcon now features a user-friendly online training program.

“The CV-5000S Online Training Program gives our customers the added reassurance of always having support and backup available 24/7. We are very pleased to launch this system and believe it will be of great benefit to all users of our automated refraction systems. The CV-5000S is the first in a series of Topcon online training systems and we plan to expand the program to include additional products in the near future,” stated Bob Gibson, VP of Marketing for Topcon Medical Systems.

For more information on the CV-5000S Automated Refraction System, please visit www.topconmedical.com/products/cv5000s.htm.

About Topcon Medical Systems, Inc.

Based in Oakland, NJ, Topcon Medical Systems (TMS) is a leader and technical innovator in the field of ophthalmic instrumentation. For more than 40 years, TMS has offered the most complete and technically advanced line of ophthalmic equipment in the U.S. marketplace. This equipment comprises the largest selection of precision ophthalmic and optical instruments from one manufacturer, providing a complete range of products for general and specialized applications. TMS manages ophthalmic dealer sales, corporate and government sales. TMS is a division of Topcon America Corporation, a wholly owned subsidiary of Topcon Corporation of Tokyo, Japan.
