Mr. Jay Roman
Topcon Canada Inc.
5621 – 11th Street NE
Calgary, AB
T2E 6Z7

Dear Mr. Roman:

I am writing this letter to thank you and to let you know how pleased we have been with the I-Care Tonomter that you have generously let us demo for quite some time now.

We had first seen the I-Care Tonometer at another office in Red Deer. Once a month we hold a clinic there. After using it in that clinic, we decided that we would like to try one in our office in Edmonton.

We found it very easy to use. Training new staff members was very quick and simple, only a few minutes. We found it to have a higher range of pressures than our older tonopens. Our old ones ranged from 6 to 30, where as the I- Care Tonometer ranged from 2- 40. We found it more efficient because we could skip the step of administering Alcaine before checking pressures. We found it less maintenance as our old tonopens needed constant cleaning.

We found that patients loved it too. Repeat patients all commented on how much easier it was for them. Problem patients who couldn't keep their eyes open before had no trouble with the I-Care Tonometer.

It has been a very good experience using this product. On top of a great product, the Representatives at Topcon have been very friendly, knowledgeable, and very helpful. Thank you very much.

Sincerely,

Julia Luong
