Territory Manager, BC

To Whom It May Concern:

The Topcon 3D OCT-1 Maestro is super user friendly. It has auto alignment and focus, giving a nice wide field OCT scan of the optic nerve and macula. The fundus image is incredible. Results are instant, making the task of sending out for testing and waiting for results for two weeks no longer an issue. We are able to identify and diagnosis immediately. It is clearly worth it. I would highly recommend this machine to anyone in the ophthalmic business.

Graham was top notch in training my staff how the Maestro works. He was flexible in his schedule to accommodate my busy clinic. He provided me with a demo model to try out before purchasing and was quick to deliver and set up when our own model arrived. An added bonus is that it is able to connect to Plexia, the EMR system. So no print out necessary, results are electronically sent from the Maestro right into the patient's file. Graham was able to work together with Plexia to make this transition possible.

I am extremely happy with my decision to purchase the Topcon 3D OCT-1 Maestro.

Sincerely,

Pierre Faber MBBS FRCSC
